## Cambridge Boy Helps to Make a Difference.

By Emily Gonzalez

Cambridge, Mass. - Have you ever thought of helping the people who don't have the same life you do, like the poor, the hungry, the disabled, or even the homeless? How would help them? Well, one ten year-old boy from Cambridge, Massachusetts found a way how.

"Have a nice day" or "try to smile" are just two of the many little notes of encouragement, ten year-old Liam Hannon writes to the homeless. It all started this summer after summer camp. He started doing the lunches with notes; just giving out 20 bags a week. But that simple act eventually ended up with making 60 lunches per week. Besides making lunches, he also helps by donating school supplies to homeless children, and has his own facebook page, [facebook.com/groups/liam'slunchesoflove.com](https://www.facebook.com/groups/liam'slunchesoflove.com), here you can help donate to others.

## Trump Ends DACA Program

Keyana Tounou

President Donald Trump is ending the Deferred Action for Childhood Arrivals, also known as the DACA program. It was a program started by former President Barack Obama. The program allowed undocumented immigrants brought to the U.S. as children to remain in the country. The Trump administration wouldn't accept any more applications after September 5th.

President Trump will allow any DACA recipients with a permit set to expire before March 5, 2018 the opportunity to apply for a two-year renewal as long as they apply by October 5. Trump said, "I am not going to just cut DACA off, but rather provide a window of opportunity for Congress to finally act." 800,000 young adults are eligible for deportation. Lives of thousands will change.

## 7th Grade Volleyball's New Coach

By: Nate Cederoth

Mrs. Hulke is the new 7th grade volleyball coach! She is very happy to coach the Girls Volleyball team. It was a great opportunity for her and she took it! The team is happy to have Mrs. Hulke as their coach. "The 7th grade team started off strong," Mrs. Hulke explained, "because of a team that is hard working, dedicated, and disciplined. I am looking forward to seeing what the rest of this season brings for the team."

Some players attended a volleyball camp at Augustana College. The instructor is happy to have anyone who would like to attend. They accept players in June and July. Seton's practices are Monday, Wednesday, and some Fridays, at Culeman's Hall, from 3:30 to 5 after school. The games they play at other schools are on Tuesday, and the games they play at home are on Thursdays.

## Gulls are Causing Trouble

By: Giovanni Gonzales

Denard Span has fears and weaknesses, but his biggest fear is a gull splatting on him as he is making a catch in the outfield.

It could happen! The birds regularly come because of the San Francisco Bay to hover over the Giants at AT&T park.

Both the Oakland Athletics and the San Francisco Giants are having trouble with the gulls. The Oakland Athletics have a plan to get rid of some of the gulls. They have two falcon shaped kites to scare them off. The fans of the Oakland Athletics named the two falcon shaped kites "Falcon McFalconFace" and "Scott Hattebird" who is named after a Oakland Athletics star Scott Hatteberg.

## State Law Wants to Ban Drones

By: Ciara Barton

## Soccer Star Deported

By: Rico Byrd

Lizandro Claros Saravia, is a 19- year old soccer star playing for the University of North Carolina who was deported to El Salvador on 8/28/17. When he was younger he and his brother Diego came into America illegally using fake visas and passports. Lizandro went to high school at Quince Orchard and was a soccer star on the rise. He and his brother lived in Maryland before they were deported. Lizandro said, "I do not know if I have a future in this country".

If you do not know deportation is when a foreigner from a country, typically on the grounds of illegal status or for having committed a crime is sent back to their home country. Even though they warned him of deportation he still played in his soccer games. He played every game every

A state lawmaker Julie Morrison, says, "Using drones during hunting season gives hunters an advantage to finding animals easier." "Most of the hunters I've talked to see using drones as cheating. They want to keep the hunt challenging", as Morrison says in an interview. Other hunters say "Animals deserve a chance to escape to make things more competitive instead of dying right away".

An existing state law says similar penalties on hunting out of season or during prohibited times. If the banning of drones during that time becomes eligible, hunters who get caught will be punished by a fine up to \$2,500, one year in jail, or two years of probation. Julie Morrison says "because there are similar laws

## Hulu and Spotify Give Students a Great Deal

By Jake Casel

Wouldn't it be the dream to watch every episode of "Gravity Falls" and listen to unlimited Taylor Swift songs for a low price? Now college and university students can! Spotify and Hulu are teaming up together to give students a deal. Now college and university students can have Spotify Premium and Hulu for only \$5.00. Hulu and Spotify want young customers to experience a new kind of entertainment.

Hulu and Spotify are hiring third party customers to make sure people outside of colleges and universities don't make fake accounts to get the deal themselves. Regularly Spotify Premium will cost you \$10.00 per month. Hulu cost \$8.00 for the regular plan or \$12.00 for Hulu plus. Spotify already had a deal with students before. For five dollars you could have premium. Now they basically threw in Hulu for free.

## Robots Playing Soccer

By: Francisco Rodriguez

Would you like to see robots play soccer? Well they have officially started. It began in the 21st century in Nagoya Japan. The Robots are sent to play for colleges all over the world. Some robots aren't even real. They are just illusions and they just stand there and move around in circles. There has to be at least 6 robots on the field. If there aren't enough robots on the field the team has to forfeit. This is the 2nd time there has been a robot competition in the world.

## How Animals Beat the Heat

By: Alex Edwards

Have you ever wondered how animals beat the heat? It's pretty simple actually. Here are some tactics of how animals stay cool: Panting helps to keep them cool because it releases heat like a human releases heat with every exhaled breath. Dogs and cats also have fur on their bodies. Dogs and cats can shed their fur to stay cool on hot days. On cool days they don't shed as much.

Let's talk about how dogs beat the heat in Los Angeles, California where it is 95 degrees. Most animals are not friends with the heat. You can't depend on your pet to stay cool- you still have to take care of your pet with the proper methods.

## Solar Flare Massacre

By: Jason Bowker

Do the natural disasters over the last month keep on rolling? Yes and no. Over the past week, seven massive solar flares have released from the sun in seven days. This abnormal scene is unusual. This has been happening because magnetic energy in the sun has been building up and has suddenly been releasing.

Because of this occurrence, on September 10th a radio blackout warning went out across the nation. If this radio blackout would have happened, almost all radio signals would've gone out. In some occasions, it can cause disruption to planes and satellites which can be very dangerous. All of these massive solar flares have been emitted from the same active region. Here on Earth the solar flares haven't caused disruptin...yet.

## Why do we Get Brain Freezes?

By Camryn Caleo

You might be wondering why every time you eat a bowl of ice cream, you get a brain freeze. It's called the "trigger effect". The brain freeze starts when a cold object reaches the roof of your mouth. Your body's first reaction is to make the blood vessels constrict. It's basically a shock system similar to when you touch something hot, you pull your hand away from it. It rushes blood to warm your mouth up. Meanwhile the nerves that are on the sides of your mouth start to dilate and the nerves next to it send signals to your brain saying something is happening. A few seconds later, your brain realizes that the coldness and the dilation is happening in your mouth.

Brain Freezes vary from different people. Some will experience horrible pain for minutes and others will only feel it for a couple of seconds. So the next time you eat your ice cream too fast you will know what is going on in your head when you get a brain freeze.

## Piney the Frog

By: Alex Edwards

High in the French Alps, on one of the first snow-melting days in early June, a European common frog comes out from hibernation. At an elevation of more than 8,850 feet the frog sets out across a seemingly endless snowfield in search of a suitable pool for breeding.
